

J.D. BARDWELL

UX DESIGNER | QA & EVALUATION | ACCESSIBILITY

Belton, Missouri | bardwelljustin@gmail.com | github.com/theRensisioure

SUMMARY

Designer and QA/evaluation practitioner building accessible, operator-facing software. Focuses on dyslexia-aware interfaces, rubric-based output review, and technical documentation. Brings software QA experience at Cerner plus independent product design and evaluation work.

CORE STRENGTHS

Accessibility & UX

Dyslexia-aware design, accessible typography, design-system consistency, interface prototyping

Tools

Python, React, Git, GitHub, Zig

QA & Evaluation

Rubric-based evaluation, annotation, transcription review, audio-text alignment, technical documentation

Product Surfaces

Dashboards, session boards, directory trees, maps, reading interfaces

EXPERIENCE

Independent Product Design & Evaluation | Self-directed

June 2026 - Present

- Designed and prototyped 12+ product surfaces, including dashboards, session boards, directory trees, maps, and reading interfaces; iterated on typography, contrast, and layout for dyslexic readers.
- Built a Windows-oriented interface for locating sessions, previewing files, filtering results, and organizing work across multiple providers.
- Evaluated 900+ session transcripts over two months (>200M tokens in; ~30M out) against documented expectations; recorded inconsistencies for correction.

Sesephus | github.com/theRensisioure/sesephus

Offline-first voice journal with local transcription, entry scoring, dashboard, and encrypted local vault.

Software QA Intern | Cerner Corporation, Kansas City, MO

January - May 2019

- Wrote automated quality-assurance tests for an internal IT ticketing system, working independently with senior-engineer review.
